p.2

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method, comprising:

determining a device <u>oriented</u> context for a specific device associated with an identity, wherein said device <u>oriented</u> context provides an availability status of said specific device;

determining an identity <u>oriented</u> context for said identity, wherein said identity <u>oriented</u> context provides an availability status of said identity;

determining an availability rule associated with said identity;

determining, for a specific time, a true availability of said identity based, at least in part, on said device <u>oriented</u> context for said specific device <u>associated with said identity</u>, said identity <u>oriented</u> context, and said availability rule, and said specific time; and

providing data indicative of said true availability of said identity.

- 2. (Previously Presented) The method of claim 1, further comprising receiving a request for information regarding true availability of said identity.
- 3. (Previously Presented) The method of claim 1, wherein said determining said true availability of said identity includes determining availability of said identity via at least two different media channels.
- 4. (Previously Presented) The method of claim 1, further comprising establishing said availability rule.
- 5. (Previously Presented) The method of claim 1, wherein said providing data indicative of said true availability of said identity includes displaying an interface indicative of said availability.

Application Serial No.: 10/673,846 Amendment and Response to May 10, 2007 Non-Final Office Action

- 6. (Previously Presented) The method of claim 5, wherein said interface identifies said identity.
- 7. (Previously Presented) The method of claim 1, further comprising determining said identity.
 - 8 14. (Canceled)
 - 15. (Currently Amended) An article of manufacture comprising:

a computer readable medium having stored thereon instructions which, when executed by a processor, cause said processor to:

determine a device <u>oriented</u> context for a specific device associated with an identity, wherein the device <u>oriented</u> context provides an availability status of the specific device;

determine an identity <u>oriented</u> context for said identity, wherein the identity <u>oriented</u> context provides an availability status of the identity;

determine an availability rule associated with an identity;

determine, for a specific time, a true availability of said identity based, at least in part, on said device <u>oriented</u> context for said specific device, said identity <u>oriented</u> context, and said availability rule, and said specific time; and

provide data indicative of said true availability of said identity.

- 16. (Currently Amended) A system, comprising:
- a processor;
- a communication port coupled to said processor and adapted to communicate with at least one device; and
- a storage device coupled to said processor and storing instructions adapted to be executed by said processor to:

Application Serial No.: 10/673,846 Amendment and Response to May 10, 2007 Non-Final Office Action

determine a device <u>oriented</u> context for a specific device associated with an identity, wherein the device <u>oriented</u> context provides an availability status of the specific device;

determine an identity <u>oriented</u> context for said identity, wherein the identity <u>oriented</u> context provides an availability status of the identity;

determine an availability rule associated with said identity;

determine, for a specific time, an availability of said identity based, at least in part, on said device <u>oriented</u> context for said specific device, said identity <u>oriented</u> context, and said availability rule, and said specific time; and

provide data indicative of said availability of said identity.

17. (Previously Presented) The method of claim 1, wherein said identity is associated with a plurality of devices.
